ENTERPRISE TRANSFORMATION & STRATEGIC OPERATIONS

Complex change. Measurable momentum.

50% shorter delivery cycle

Aligning people, systems, and operating processes to turn complex enterprise initiatives into accountable delivery.

$60M+

Enterprise portfolio

25 simultaneous initiatives across applications, infrastructure, and business operations.

25 of 25

Initiatives completed

All 25 completed in 20 months, coordinating priorities across multiple regions.

THE OPERATING IMPROVEMENT

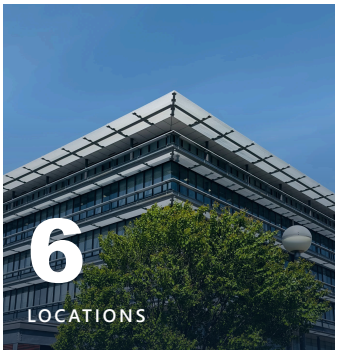

Six months. Rebuilt as three.

Repeatable implementation plans, governance artifacts, and operating playbooks reduced average delivery time by 50% and were adopted across the enterprise.

100% **Completion of committed milestones.**
Clear ownership, executive decisions, and coordinated delivery priorities.

Real complexity. Demonstrated delivery.

Six-site transformation

CHALLENGE

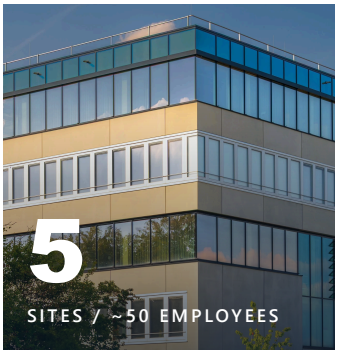

Coordinate the largest and most complex multi-location integration I led.

LEADERSHIP ACTION

Aligned technology, teams, and stakeholders through one delivery plan across six locations.

DEMONSTRATED RESULT

Completed all committed milestones.

Five-site operational transition

CHALLENGE

Transition five operating locations and approximately 50 employees while daily operations continued.

LEADERSHIP ACTION

Coordinated technology, data, and user readiness across the locations.

DEMONSTRATED RESULT

Maintained business continuity throughout the transition.

New York delivery

CHALLENGE

Coordinate a high-visibility transition across three New York City locations.

LEADERSHIP ACTION

Led the multi-site transition, coordinating cross-site logistics and stakeholder needs.

DEMONSTRATED RESULT

Completed all committed milestones.

100+ organizations

Supported across my career, connecting hands-on technology experience with accountable integration leadership.

1,000+ employees supported

Across integrations that brought people, applications, data, and operating environments together.

Align people. Improve processes. Deliver results.

Led project managers, engineers, and cross-functional teams; partnered with C-suite and regional leaders on governance, risks, priorities, and outcomes.
